System Engineer/DevOps

Work Experience:

June 2018 - Now: Altoros development - System Engineer:
I provide technical support of infrastructure and developers departments through Microsoft TFS, my daily tasks are different, but most of them are:
- Active directory - User creation, passwords
- vSphere - Virtual machines, ESXi hosts maintenance
- Jenkins - plugins installation, nodes maintenance
- AWS - EC2, RDS instances, organizations, billing
- NodeJS ecosystem - NPM, NPM Enterprise, I provide L1 support
- Bash and PHP scripts for different REST APIs, data storage and so on.
- Docker containers

November 2017 - May 2018: Stalpro.com:
I managed to provide administrative tasks for small office of 50 workspaces with 2 Win2012 servers. My main goal was to administer and develop NodeJS driven mining pool for ZCash forks. I did it on 4 Hetzner VDS. I have successfully ran pools for 4 forks and improved the codebase of the project. The most difficult task was to find a right person to ask, because codebase was and, I believe, is very buggy.
The most prominent technologies were:
- NodeJS, pm2, forever
- LXC, Docker
- Ubuntu 16.04 and CentOS 7

January 2015 - October 2016: Spacewebdesign.com:
I was working in team with two people located in Moscow and Berlin. We were creating web sites with photo galleries and text content. I was using custom self developed php5+jquery CMS with minimalistic design. Also we started one web-shop with Prestashop engine.

January 2012 - January 2014: Kaspersky Labs:
It was remote job. I was doing translation jobs, by using automatic tools and scripts(Vb. NET) I have written. Next thing was to test KMS, KIS and KAV builds, check for GUI defects and send feedback to developers. The most frequent software I was working with was SDL Passolo

Education: 2001-2007 Moscow State University of Electronic Technology - "Telecommunications, Secured Data Channels"

Skills:

- Linux OS Administration(iptables, kernel compilation, zfs raid)
- Bash and Php(functional programming) + Git
- Amazon AWS EC2, VPC, S3, RDS
- MySQL, Redis
- Apache2. Nginx web servers

Personal info:
I'm skilled musician, I play guitar and sing. My favorite music is uplifting soft songs, funk, blues and some rock. Also I'm interested in medicine and history of religion.
